SUMMARY

Third-year B.Tech Information Technology student with strong foundations in Data Structures & Algorithms, Object-Oriented Programming, Computer Networks, and backend software development. Proficient in Java, Python, Spring Boot, REST APIs, and database systems, with hands-on experience building scalable applications and secure web solutions. Strong problem-solving skills with interest in software engineering and network technologies.

EDUCATION

Sanjivani College of Engineering, Kopergaon - B. Tech in Information Technology (Cybersecurity Honours) | CGPA: 9.31/10 | 2023 – Present

Shri Ganesh Junior College, Korhale - HSC | 82.50% | 2021 – 2022

Shree Saibaba English Medium School, Shirdi - SSC | 93.80% | 2019 – 2020

PROJECTS

ProcureAI: AI-Based Tender Evaluation & Eligibility Analysis System - Python, React.js, Node.js, MongoDB

- Developed an AI-powered platform for tender eligibility analysis and automated compliance checking.
- Built intelligent document processing workflows for requirement extraction and procurement decision support.

SaiKrupa Polymers: Business Operations & Inventory Management System - React.js, Node.js, MongoDB

- Developed a full-stack business management system for inventory, customers, orders, and daily operations.
- Built secure APIs and responsive interfaces to digitize manual business workflows.

Online Voting System - HTML, CSS, JavaScript, MySQL

- Developed a secure web-based voting platform.
- Implemented user authentication and database management.
- Ensured secure vote casting and result processing.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, SQL

Development & Databases: REST APIs, CRUD Applications, Backend Development, MySQL, H2 Database

Tools & Platforms: Git, GitHub, IntelliJ IDEA, VS Code, Linux

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems

Networking: TCP/IP, DNS, HTTP/HTTPS, OSI Model, Subnetting

CERTIFICATIONS

Programming & Development:

- NPTEL: Programming in Java, Joy of Computing using Python
- Coursera: Python for Beginners, Python Data Structures
- Infosys: Front-End Developer Certification

Communication:

- NPTEL: Employment Communication (Lab-based)

ACHIEVEMENTS

- **Smart India Hackathon 2025 (Problem ID 25038)** – Developed “Blockchain-Based Blue Carbon Registry and MRV System” using Solidity, React.js, Node.js, and IPFS for decentralized carbon credit tracking.
- **Infosys Cohort 4 (External Activity)** – Selected for industry-led cohort program by Infosys; gained exposure to enterprise-level project workflows and coding best practices.

INTERNSHIP EXPERIENCE

Virtual Internship – Java Development (Spring Boot) | Infosys Springboard – Virtual Internship 6.0

Developed an Automated Task Reminder System using Spring Boot with scheduling, email notifications, and database integration.
